

# Hope Mills, NC Multimodal Congestion Management Plan

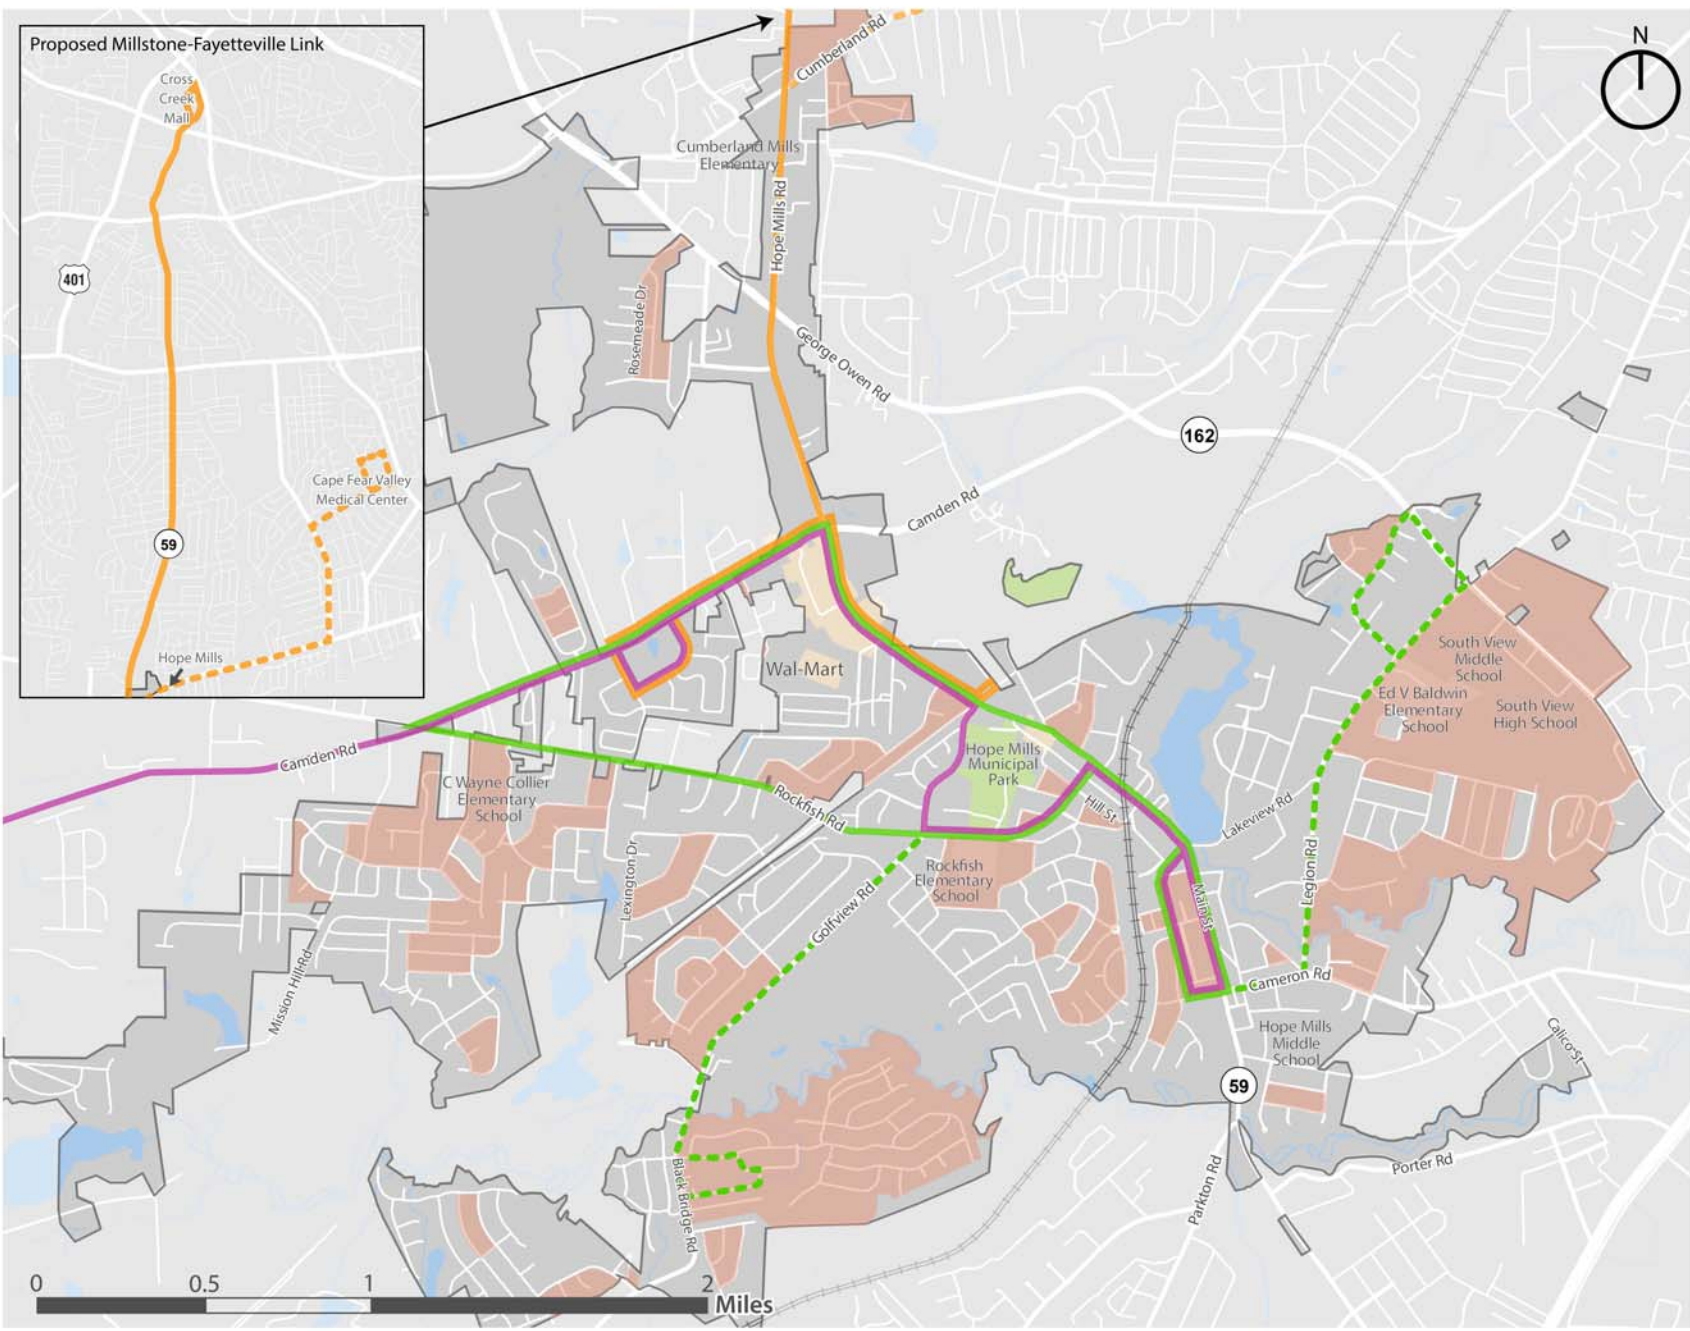

## Proposed Transit Network

- Circulator 1 (FAST)
- - - Circulator 1 with neighborhood connections
- Circulator 2 (FAST)
- Millstone-Fayetteville Link (FAST)
- - - Millstone-Fayetteville Link with connection to medical center
- Potential need/demand for public transit

Potential need or demand for transit is measured using the density of transit-supportive land use and demographic factors, including:

- population density;
- concentration of zero-vehicle households (greater than 10%);
- presence of an employer;
- presence of a school; and
- presence of a library or community center.

**Data Sources:** Fayetteville Area System Transit (FAST); **Transit Propensity Analysis:** KAI.  
Note: FAST proposed routes not based on KAI analysis.
